Professional Summary

Software Developer with over 3 years of professional experience in developing and maintaining web applications using JavaScript (ES6+), HTML, CSS, and Python. Experienced in building backend APIs with Flask/Django and Node.js, implementing role-based access systems, and integrating third-party services. Hands-on experience with cloud environments (AWS, Azure), along with exposure to automation, data integration, and Power BI reporting. Comfortable working across the entire development lifecycle, with a strong focus on clean code, performance, and reliability. Open to relocation anywhere in India.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+)
Backend: Python, Flask, Node.js, REST APIs.
Databases: MySQL, Sequel.
Tools & Platforms: Git, Power BI, AWS, Azure
Familiar/Learning: C#, .NET MVC, Java Spring Boot

Experience

IT Engineer Intern
MyCardiumAI

03/2024 to 02/2025
Liverpool, United Kingdom

- Supported and maintained AWS cloud environments, assisting with availability monitoring, security compliance, and performance optimization.
- Developed Python-based integrations with third-party tools (**Clockify, Clinical Trial systems, SharePoint**) to enable real-time Power BI reporting using REST APIs.
- Automated routine infrastructure and testing tasks using **Python**, including setting up **Windows Sandbox environments** for testing and debugging.
- Assisted in configuring **CI/CD workflows** using **Jira, Bitbucket**, and **AWS Amplify** to improve deployment efficiency.
- Supported endpoint security setup and monitoring using **Bitdefender** and **NinjaOne**, along with basic IT infrastructure support.

Software Developer
Cura GRC Private Limited

12/2020 to 08/2022
Hyderabad, India

- Designed and developed responsive web applications using **HTML, CSS, and JavaScript**, ensuring optimal user experience and adherence to modern **UI/UX principles**.
- Built and maintained full-stack web applications with authentication, admin panel functionality, and product management features using **Node.js and sequel server**.
- Implemented **multilingual support in web applications**, enhancing accessibility and usability for a global audience.
- Built a **fully functional offline website**, ensuring usability even without internet access & **Auto Update when online**.
- Developed a **License Audit Reporting tool** using **Node.js** to categorize and report system issues,

improving debugging and error resolution efficiency.

- Managed production builds and performed thorough pre-deployment checks to ensure application stability and accuracy.

Education and Training

MSc Data Science and Big Data Analytics

Wrexham University

Sept 2022 – Sept 2024

North Wales, United Kingdom

Dissertation Project:

- **Waste management Detection:** Developed a project that helps improve waste management. The system detects when waste bins are full and notifies the municipality to pick them up. It also finds the fastest route to the recycling center, making the whole process quicker and more efficient.

B.Sc. Computer Systems & Engineering

Loyola Academy Degree & PG College

June 2017 – Sept 2020

Hyderabad, India

Certifications

- Arduino Technology
- Internet of Things (IoT)

Additional Projects

- **User Admin Portal** **05/2025 – 07/2025**
A custom Admin Portal with CRUD functionality for user management and permissions assignment, ensuring secure backend data encryption. Upon creation, users receive an automated password and can set a new password on their first login. This prototype dashboard streamlines user onboarding, access control, and security management.
- **Voice Assistant Development** **04/2025 – 04/2025**
Created a custom voice assistant capable of performing various tasks using speech recognition and natural language processing.
- **Voice-over for Diabetes Device** **05/2025 – 05/2025**
Integrated a voice-over feature into a diabetes device using Raspberry Pi OS, ensuring accessibility for visually impaired users. In developing AI-driven solutions for practical challenges.
- **Calendar App** **08/2025 – 10/2025**
Developed a web application called "Calendars" to customize and filter important emails and meetings using C#, MVC, Google Cloud, and REST APIs.
- **Threat Intel App** **07/2025 – 08/2025**
A web-based Threat Intelligence App designed to identify and analyze potential threats targeting computer systems and networks. It provides real-time insights, risk scoring, and detailed threat profiles for proactive security measures. This tool enhances situational awareness and supports incident response strategies to mitigate cyber risks.
- **Java & Spring Boot Development (In Progress)** **11/2025 – Present**
Self-learning backend development through hands-on practice projects.
